# Saigon 5 Card

NO COMMISSION  
EASY TO PLAY  
EASY TO LEARN  
ALL TIES ARE PUSH

## OBJECT OF THE GAME

The object of Saigon 5 Card is for the player to create two hands out of the five cards in his/her hand: a three-card hand (the player's three card hand must add up to 10/20/30 to qualify) and a two-card hand (once a player qualifies, all two card hands are compared to determine the winner). In the two-card hand the point value 10 is the highest and 1 is the lowest. All ties are push.

Note: Regardless of the player's qualifying hand/three card hand total, a winner is determined solely on the player's two-card hand. All winning hands pay even money, except when the player wins with a 5 point hand (pays 50% of bet).

## CARD RANKINGS

Each card is given a point value: 2s through 10s have their own denomination as their value; Jacks, Queens, and Kings have a value of 10, and Aces have a value of 1. Joker can be used in the two-card or three-card hand as a 3, 6, or 9.

## BONUS BET

Joker can be used in the Bonus Bet as an Ace or to complete a Straight, Flush, Straight Flush, or Royal Flush.

## POT BET

The pot bet is always the table minimum. Each player must place a pot bet. The player with the highest two-card hand point total wins the pot bet.
